**Subject:** justification for Dr. Don Leyden as a consultant

Dear Roger--

I am requesting that we renew our consulting contract with Dr. Don Leyden. Dr. Leyden's knowledge of the tobacco industry, cigarette smoke analysis, analytical chemistry, and validation requirements makes him an invaluable resource for us in terms of biomarker selection, guidance for method development and evaluation, and interpretation of bioanalytical data. He has the background and perspective to augment greatly our review of the Pilot TES results.

Regards,  
Robin
